

Alarm Violations Cash Collections Information Sheet

Overview

To support the [False Alarm Ordinance](#) (effective December 18, 2002), the Alarm Violations Cash Collection system represents a joint effort between the Enfield Police, Finance, and Information Technology departments. It is a limited extension to the DataForce police records information management system which meets a business need of the Police Department by allowing the Tax Office to accept payment of false alarm fines and to input amounts directly into DataForce. The IT Department collaborated with the provider of DataForce to integrate the two systems.

CAD Nbr	Ticket	Ticket Date	Fine Amount	Date Paid
		16-JAN-03	50.00	
Issuing Officer		Delivery Officer		

Street	Num	Unit	Landmark	Viol Date
	00001			14-JAN-03

Highlights

- Tax Office staff is able to accept payment of false alarm fines and input amounts directly into the DataForce tracking system
- Tax Office staff is able to branch directly from the Tax system cash collections screens to the Alarm Violations Cash Collections screen
- Secure design prevents unauthorized DataForce access
- Reporting includes collections for selected date and total alarm fine collections

Interaction with Other Systems

- The Alarm Violations Cash Collections system interacts with DataForce
